THE SUSTAINABLE BUILDING TOPICS WE ADDRESS

Sufficiency

- Reduce land consumption
- Promote multiple use
- Plan with appropriate use in mind
- Prioritise low-tech solutions

Climate action

- Reduce carbon emissions
- Introduce ways for buildings to generate energy
- Plan carbon sinks

Circular design

- Support resource protection and the re-use or re-purposing of materials
- Use materials that contain no harmful substances
- Plan with flexibility and adaptability in mind

Environment

- Preserve biodiversity
- Protect water resources
- Influence microclimates positively

Positive spaces

- Focus more on the needs of urban districts
- Plan with health promotion in mind
- Promote concepts that people are inspired by and identity with

Baukultur

- Implement high design quality
- Create timeless and future-ready architecture

INITIATIVE

PHASE

SUSTAINABILITY

OUR ACTIVE CONTRIBUTION TO SUSTAINABLE BUILDING

As part of the 'Phase Sustainability' initiative, we are committed to working with building owners, applying the sustainability declaration to our projects and setting individual goals together, for each and every project.
